

Reagan Landing documentary update

13 October 2026 | English update to the retained map and atlas

Five current Timer 4 rows have been reconciled with existing, exact-address parcel records. The update adds documented references at 811 Clayton View and 16407 Lilly Elaine and extends the explicit endpoints for zone 51. It does not validate field installation or live programming.

Documented changes

Source row	Timer / zone	Literal current address reference	Type
T 4 r17	4 / 15	Clayton View 811	S
T 4 r19	4 / 17	Clayton View 811	D
T 4 r23	4 / 21	Clayton View 811	R
T 4 r51	4 / 49	Lilly Elaine 16407	S
T 4 r53	4 / 51	Lilly Elaine 16403-16407	D

How to use the retained pages

This dated update takes precedence for the listed documentary references. All original map and atlas pages are retained as the earlier snapshot. Their printed colors, reference labels, row citations and totals are historical; use this update and the interactive map for the revised records. Other previously documented uncertainties remain in force.

Parcel geometry is unchanged. Documentary associations are not hydraulic boundaries or proof of physical controller, valve or pipe locations. Current controller programs and operating schedules have not been verified.

Source inventory

<https://docs.google.com/spreadsheets/d/1IASBeJjv5AAqtj0HBZGTx7I0wwfNnVni/edit>

Original inventory modification: 2026-10-07T16:05:54.231Z. Read and compared on 13 October 2026. The modification timestamp alone was not treated as evidence of a data change.
